EDUCATION

Bachelor of Electronics and Communications Engineering
Mahakal Institute of Management, Ujjain
June 2016 - May 2020

WORK EXPERIENCE

MERN Stack Developer

Newrise Technosys Pvt. Ltd. – 2024 (Present)

- Applied responsive design principles in MERN stack projects to ensure consistent user experiences across devices.
- Developed and maintained content management features in MERN applications, enabling real-time content updates.
- Used performance analysis tools like Google Lighthouse and WebPageTest to enhance application speed and efficiency.
- Collaborated on pharmacy management systems, improving workflows through front-end and back-end integration.

- Optimized MERN applications by refactoring code, minimizing assets, and enhancing server-side and client-side processes.

Frontend Developer (React.js)

Newrise Technosys Pvt. Ltd. – 2022 - 2023

- Specialized in React.js with expertise in Redux and RTK Query for efficient state management and API handling.
- Integrated RESTful APIs and real-time communication using WebSockets via Socket.io.
- Built dynamic, scalable user interfaces with AI-driven features to enhance user experiences.
- Utilized Axios for seamless HTTP requests and efficient API handling.

MERN Stack Intern

Universal Informatics – 2022 (6 months)

- Applied responsive design principles in MERN stack projects for seamless cross-device experiences.
- Developed content management features, enabling real-time updates for MERN applications.
- Collaborated on pharmacy management systems, streamlining workflows with effective front-end and back-end integration.
- Utilized Google Lighthouse and WebPageTest to optimize application performance.

PROJECTS

• Point of Sale Web & Backend

Technologies: React, Next.js, Node.js (Adonis.js), MySQL, NestAuth, React-hook-form, Material UI

Developed a complete point-of-sale system with a robust backend.

• Cafe Management System

Technologies: React, Redux, RTK Query, React Router, React-hook-form, Axios, Material UI

Built a cafe management web app with real-time data integration and responsive design.

• NRT Dynamic Website

Technologies: React, Redux, RTK Query, React Router, React-hook-form, Axios

Developed a dynamic website with API integration for a smooth user experience.

- **Contract Management CMS (KPMG)**

Technologies: React, Next.js, Socket.io, @casl, React-hook-form, Axios, Material UI, Tailwind CSS

Developed a contract management system for KPMG with real-time communication features.

- **PartyManiaie App**

Technologies: React, Redux, RTK Query, React Router, React-hook-form, Axios, Tailwind CSS, Material UI

Created a feature-rich event management app.

SKILLS

- Programming Languages: HTML, CSS, SQL, JavaScript, TypeScript, SASS, JSON, REST API
- Frameworks & Libraries: React.js, Node.js, Next.js, TailwindCSS, Redux, Angular, Express.js
- Databases: MongoDB, MySQL
- Tools: Git, Jira, Google Lighthouse, WebPageTest
- Additional Skills: Effective Communication, Problem-Solving, Time Management, Teamwork, Remote Collaboration
